ARender

Seamlessly control corporate risk and compliance

Manage Compliance

All types of organizations face the challenge of protecting customer data and ensuring regulatory compliance when working with confidential customer or corporate information. ARender's redaction feature ensures the protection of personal and confidential information for staff, suppliers, and customers, for guaranteed compliance with minimal business impact.

Ensure Content Integrity

When dealing with sensitive corporate information such as financial data, legal data, or contracts, ensuring the validity and accuracy of that data is critical. ARender ensures that the underlying document is preserved in its original state, so the integrity of that data is maintained at all times.

Minimize Business Impact

Maintaining security and compliance can be costly and time consuming for business and department managers. ARender offers an easy-to-use solution that integrates with your existing applications without the need for expensive third party software. The solution is quick to deploy and requires no user training.

Centralize Data Governance

Meeting strict compliance guidelines and regulations like GDPR and CCPA can require hefty IT overhead and often includes more damage control than upstream prevention. ARender's solution sits on top of your existing IT systems for seamless, centralized control over all corporate information without the need for regular maintenance or oversight.

Automated Redaction

Protect your customers' PII by masking any sensitive information in any content you're processing

Advanced User Permissions

Control which users can and cannot access content to ensure security and prevent unauthorized access

Detailed Audit Trails

Maintain detailed audit trails and user activity records to track any modifications or annotations of content

Secure your content without ever changing the underlying file
